

Fin Seal Exchange Unit for your Horizontal Flow Wrapper.

The **Fin Seal Unit** of your machine seals long seams of your packaged product. Due to steady use and natural production conditions it can show indicators of common wear such as noticeable noise and shrunken gearwheel flanks.

To time-efficiently maintain your machine, we offer you complete **Exchange Units** that can replace the worn-out Fin Seal Unit just when it is needed. Depending on its condition, additional parts may be exchanged as well.

For a problem free installation and best results, we recommend that a Syntegon service expert assists or completes this installation for you.

Your packaging machine will usually have three Fin Seal Units installed. In addition, a Rebuild Kit allows you to overhaul the complete assembly of Fin Seal Units.

YOUR BENEFITS

- ▣ Customized service designed for your machine type
- ▣ Fast turnaround of maintenance to shorten downtime
- ▣ Hire a Syntegon technician or install yourself

DELIVERY TIME

- ▣ 4-6 weeks

Suitable Machine Types

- ▣ Pack series
- ▣ Servotronic
- ▣ Microtronic
- ▣ Super H
- ▣ Linium

Rebuild Kit

Besides a complete Fin Seal Unit a **customized Rebuild Kit** might be an alternative for you. Depending on our machine's condition, an individual Rebuild Kit consists of several optional spare parts to be exchanged such as:

1. Bearings and seals
2. Thermocouple
3. Hardware
4. Gears
5. Air cylinders
6. Slip ring
7. Heater

Deluxe Rebuild Kit:

Contains all Rebuild Kit parts plus:

8. Servo
9. Fin caps
10. Pneumatics
11. Shafts
